El Avestruz Liado: Does the world needs another review of "By Night in Chile"? Of course not, so let me just give a few pieces of advice for the prospective reader:

- Try to allow yourself some time to read it in a single sit. The book is structured as a single paragraph, so you better read it with as few interruptions as possible.
- The first third is rather slow, the very beginning is nice but then it goes into mincing Chilean literature. I guess most of you will recognize some names like Neruda, Parra and Donoso and miss most of rest. How far you want to delve into the literary discussion is up to you, but for most readers reading a literary discussion without paragraph breaks might be asking a bit too much. My advice to them is to endure for a few more pages, once the protagonist meets two guys who want to send him to Europe the tone of the book changes completely.
- Unless you are from Chile, chances are you are will end up missing many references that are central to the plot. Try to search for a few of these names in wikipedia: Hernán Díaz Arrieta, Mariana Callejas, Michael Townley and the 1973 Chilean coup d'état. There is even a study guide at: <http://www.gradesaver.com/by-night-in...>. Now, whether you should read them before or after reading the book is (again) up to you. If you read them before you are going to get spoilers, if you read them after then a reread should be a good idea. Since this is a short book I would go for the later.

On a totally unrelated issue, the cover of the original version in spanish is one of the best I've ever seen. It shows some dogs floating in a raft navigating through a storm. What a nice metaphor for a dictatorship! In the very last line of the book you will learn what kind of storm he was actually referring to.
