Insightful reviews

Hend4215: What is my view on this book? This book is about a teen boy trying to get into college. It takes place over summer break and of course, he expects nothing unusual will happen. He will end up staying in his rented apartment/house for the summer and watch hockey if it is on and go body surfing because the waves are not very good. However, one day he is body surfing and a beautiful girl surfing swoops by and his life flashed before his eyes. He would go to the beach everyday just to see her. In this book he gets closer and closer to her in a relationship and the tension grows stronger.

I rated this book a 4 out of 5 because I thought this book was a very interesting and very good book. However, I would not necessarily give it a 5 because I did not love it. I feel that there was just too many slow parts that didn't really make me want to keep reading. It would go from an intense part to a non important part. The whole concept of the book really gets you moving and your heart beats fast in some parts. You feel the same as the main character. His emotions are strong. Also, the whole idea of how he gets this girl is actually very funny because he is obviously not good with girls. The main girl in the book, she always makes the first moves. After summer is a really good book and if you like romance then you will like this book. I recommended reading it.

Trish Doller: Not enough stars. Charming, funny, and just so real that I felt I was there at that fibro house at the beach.

Sarah: I didn't like the author's 48 Shades of Brown so I don't know why I bought this one. The reviews make it soound so much better than it is. [return][return]Alex Delaney, an Australian teenager feels bored whild vacationing at his mother's beach house and is worried about passing his final examinationes until he meets an attractive local girl.

WakenPayne: zero Stars - that ranking is really deserving to this drivel.This was once given to me by means of my grade 10 English type for me to read.Here's the matter - too little plot. more often than not it is simply speaking - not anything to strengthen the plot or something - it truly is simply talking. the nearest we ever get to a plot is a child assembly people. that is it - the rest is Nadah.Nothing within the booklet is interesting or in anyway appropriate to anything. With the paper being wasted in this it really is nearly adequate to affix Greenpeace.Unless i am being too refined - steer clear of this like you'll steer clear of a plague.

Judy O'Rourke: a truly Australian adolescent summer season scene with an genuine tone in

characters and setting.

Josephine Moon: Nick Earls at his best. A considerate mixture of humour and sensitivity that makes this a pleasant ebook for teenagers and adults alike.
