Insightful reviews

Robert: Jack London's unfinished novel, finished by another. The premise is just fabulous; the leader of a gang of assassins-for-hire is hired to have himself assassinated by his own employees...chaos ensues, along with much philosphising and humour.

The moral enigma at the centre of the story is (weirdly) reminiscent of that faced by Gawain when he has to go to the Green Chapel - and in my mind the solution is the same, too.

The tone of the novel is uniform to such an extent that I did not notice the transition from London's own work to that of the person who finished the novel. Both authors were on top form for this one, which could be said to be in the same vein as *The Sea-wolf*, but with tongue stuck firmly in cheek.

Simon: *The Assassination Bureau, Ltd.* By Jack London

It's been a while since I read any Jack London and this is one of his great unfinished novels from 1910 that has been finished by Robert L. Fish in 1963.

This book is highly relevant in these times as it is about an Ethical Assassination Bureau who only kill public figures who deserve to die for the greater good of Humanity. Say a Judge is no longer working for the good of society you could pay them and they would assassinate him, or say a bad politician etc.

The books twist is that the Bureaus chief gets the bureau hired to kill himself. The book then rips along through a chain of murders across America from New York to Chicago and Detroit and San Francisco etc all the way to Hawaii and the end.

Well the Part that Jack London wrote has a different voice as the latter is written with hindsight of what had happened in the world since Jack started the book so suddenly there are references to the forthcoming conflicts and a frankly dissappointing ending that although ingenious is somehow off with the rest of the book.

But that is a small gripe with what is a great read and has some very interesting ideas considering the times we now live in. Glad I finished it before going to Moscow as I didn't fancy carrying a title like that through Customs at the moment!!

Autumn: Jack London died sooner than he accomplished writing The Assassination Bureau . He had scribbled notes that have been fascinating and frightening approximately how he'd love it to end... like birds breaking their wings opposed to boats, useless sharks beating hearts within the fingers of fishermen, and an Irish Terrier that jumps off into shark infested seas, all of the whereas the protagonist lays dying..... a lot of these photographs look becoming for a London ending, in particular an finish a couple of tale of a bunch of assassins that imagine they're nonetheless morally straight, whilst they try to take the lifetime of considered one of their friends. It does not finish like that though. Instead, a guy through the identify of Fish ends the tale thoroughly different. to not supply Robert L. Fish a troublesome time however the finishing used to be now not befitting of a London novel. topic of fact, my bet is that it's the very finishing London attempted to avoid--the effortless one. I take note studying the finishing to the decision of The Wild and my brain was once thoroughly blown via the uncooked depth of the final paragraph written. The finishing of name of the Wild is the explanation it continues to be one of many simply books i have learn greater than once. The Assassination Bureau is ready sheer madness, but it results in the main mundane predictable approach possible. i discovered it super disappointing. i will not support yet believe that London may were unsatisfied approximately it too.

Simon Mcleish: initially released on my web publication right here in January 2002.This unusual novel, left uncompleted by means of London in 1910, used to be ultimately released simply after the assassination of J.F. Kennedy, making certain that it might be a sensation of its time. it's a strange, unconvincing novel which mirrors London's matters approximately law, morality and violence - quite the assumption of a society which countenances violence opposed to itself.The Assassination Bureau undertakes homicide for payment, of fellows that its individuals are confident should not invaluable of existence (the corrupt are the most examples given). while the pinnacle of the bureau, Ivan Dragomiroff, is approached by way of a tender guy and requested to take out a freelance on himself, he refuses, yet is finally confident that the paintings of the bureau is morally mistaken and that hence by means of his personal ideas he merits to die. A extraordinary chase throughout the US follows, as he turns into a fugitive from his personal staff (while, as a result of his personal strict morality, carrying on with to permit the

bureau entry to its funds for the bills excited about his personal murder). The hassle within the novel is in believing in Dragomiroff's altering his mind, and the remorselessness with which he sticks to this choice within the face of the probability to his life. His incomprehensible personality makes the remainder of the unconventional look arbitrary as well, and London isn't a superb sufficient author to select up the reader's curiosity in different ways. Interesting, yet finally disappointing.
