Description

Hello Reader...

...or should I say, "lost soul." I truly hate to be the bearer of bad news, but since there's no tender way to deliver the blow, I'm just going to come right out and say it. You see, you and I, well...we're dead, or if it makes it easier to hear, we have perished. And, if a softer delivery is still necessary...we have passed on.

We can no longer call Earth our home. Our souls, whether good or evil, now exist inside the Book, and we're waiting for our chance to be reborn, possibly on one of many new worlds.

Yes, I know - oh, believe me, I know - none of this makes any sense and you're probably asking yourself, "Phillip, what on earth are you talking about?" And I would be forced to answer your question by saying...Earth just doesn't exist any longer!

Just know this. I'm glad your soul was retrieved from the darkness of space and placed in here with me inside the Book. I know you're confused and have many questions, not to mention a fair amount of stress which I'm sure has suddenly surfaced because of my revelation, but it will get better, I promise. You should hang in there while I try to explain further.

The Book, known as The Book of Immortality, has a second name - Gabriel. He asked me to explain some extremely important things which are for your benefit.

First, there was a series of God Wars which lasted nearly 3,000 seasons. It was during this period of constant battling by these so-called "deities" that the entire Cosmos ceased to exist. (I say 'so-called' because I'm still not convinced they should be called gods at all.)

Second, along with our beloved Earth, the places you knew as Heaven and Hell, everything you ever loved, everything you understood, and everything you cherished as your own, exploded into countless pieces of mass, most of which still wander aimlessly through space.

Yeah, this news really sounds like one big pile of gash...not to mention it's thoroughly depressing to know that your soul is stuck inside a book, but again, hang in there... many answers will be revealed as I move forward with the telling of The Crystal Moon.

You see, prior to The great Destruction of Everything Known, I was an author back on Earth. The Book, after learning this, has asked me to gather the facts necessary to tell a series of stories. I get to share the knowledge I've gained from speaking with the souls residing inside Gabriel's pages, including the deities who perished, most during the God Wars. I will reveal the information acquired from questioning hundreds of fascinating creatures, as well as numerous other races, some of which are immortal, living on the new worlds. I've taken great care to understand everyone's emotions, their desires, their thoughts, and the reasons for doing the things they did, and will now share everything with you.

Thus, I welcome you to: The Worlds of the Crystal Moon. Let us begin with the first of many stories - Crystal Moon, World of Grayham. I do hope you enjoy my recollections.
Your friend, and fellow soul inside the Book of Immortality, Phillip "Big Dog" Jones

Allow me to take you back to a period just over 14,000 seasons ago...to a series of moments just before the destruction of Earth.

Dr. Sam Goodrich put the cold stethoscope on the boy's chest and asked him to take two deep breaths. The child jumped and Sam realized the boy was in good general health. His flu-like symptoms could be treated with a simple over-the-counter medication, so the doctor wrote out a recommendation and handed it to the boy's mother.

"Mrs. Taylor, thanks for bringing Bobby in to see me. This should do the trick. He'll be just fine in a few days." Sam smiled and gave a few other words of encouragement, then shook the woman's hand before leaving the room. As he left, his smile faded and he grimaced at the thought of his

Insightful reviews

Jeanne Sanderson: The book was recommended to me by my 80 year old mother. I was so floored to find out that she liked fantasy that I decided to read it myself. After reading Crystal Moon, World of Grayham, I have decided that I will take more recommendations from my mother. What a really fun book. This was a great escape from the murder mystery novels I usually read.

I don't normally post reviews, but I'll make an exception on this series. How fun!

George Evans: I do a lot of travelling and am always looking for good reads. I often don't read books unless someone recommends it to me. I had a friend of a friend recommend this book and I was caught from the beginning. The color artwork in the beginning is fantastic. I've never seen anything like it before. That artwork enhanced the story 300 fold.

Once I got into the story, the pace moved quickly and there was lots of action. Phillip Jones has a way of describing a fight like I've not read before. I could feel my bones crunch as I was reading. George, by far, is my favorite character. He came from toughness, isn't afraid of anything or anyone, and loves a good challenge...all for the love of his daughter. I am definitely passing this on.

Marcus Blandon: I had a cousin read this book and then pass it onto me. I thought the references to contemporary life by George while in this old world setting was the most clever part of the book. I am passing the book onto my sister next.

Annie Mccarthy: This was once an excellent story. I loved the twists and turns and the truth that the 3 major characters looked like humans i may determine with. They have been different

sufficient that i may see components of individuals I knew in every one character. This realism made it more straightforward for me to spot with the sentiments every one personality experienced. The gods are a blast! i would like to be one. this isn't average mythology. it's even more interesting. Their manipulations of the population of Grayham are like puppeteers manipulating their marionettes. i admire that.

Jazz Man Anderson: I do loads of travelling, so i've got time to read. I learn every kind of books and that i like interpreting books by means of authors I've by no means heard of. while I picked up the Crystal Moon global of Grayham, i used to be drawn into it instantly through the back and front covers and the artwork inside. So, strong job, Mr. Jones for differentiating your self in a truly aggressive market. whilst i began reading, it took a piece to get into the beef of the story, yet as soon as the velocity picked up, it used to be a good ride. I needless to say the backstory is necessary and so it needed to be told. because the tale developed, I felt empathy for characters and that i loved their escapades (I'm attempting to not supply whatever away). I certainly suggest this book.

Timothy Raab: may perhaps this be any funnier? I get pleasure from myth novels, yet what's various approximately this booklet is how the jokes hit you upside the top while you're no longer looking ahead to it. The funnies run the gamut. bathroom humor to sexual innuendo, to funny activities and reactions via the characters – they have been all in there. this can be a nice informal read.
