Insightful reviews

Jackie Simons: Read 5/00

Susan: I listened to this on audiobook. Had I been reading it, I'm afraid it may have gone a bit slower than I would like. This is my first Steve Martini book and I'll probably try the next in the series.

Dan: Another Martini book, another great read. Had a hard time putting this one down. Started it one day, finished it the next, including staying up until 2:00 or so reading (I had made the mistake of napping earlier in the evening and wasn't too sleepy; I sure was today at work though). I knew who the killer was right from the get-go, but it doesn't really matter because it's still fun to see how it all plays out and how the killer manipulates things. Hopefully the library will have some more Martini books waiting for me when I drop by later this week!

Dale: AbridgedPublished via Simon & Schuster in 2000Read by way of Chris MeloniDuration: four hours, forty-one minutesI am a relative newcomer to the works of Steve Martini, this being my 3rd book, the second as an audiobook.As a listener, i will be able to inform that Martini's craft has superior rather a lot - my first adventure with a Martini audiobook (The Judge) in simple terms accentuated Martini's overuse of the simile (he moved like a cat, etc.) - it was once so noticeable that i started a operating count number of ways repeatedly I heard them! This plot isn't really as powerful as that one, yet his talents as a author have better in order that the complete impact is de facto one in all improvement.Paul Madriani and his accomplice Harry are again for an additional flip as protagonists, even though Harry takes a backseat during this one, that is too bad. Nevertheless, the plot strikes well, suspense builds properly until eventually the finishing comes alongside and there's a little bit of a letdown. However, i'm really not one to seem down on approximately five hours of strong leisure simply because the final five mins have been a piece weak.Read extra at: <http://dwdsreviews.blogspot.com/2012/...>

Martin Baggs: comprehensive e-book five within the Paul Madriani sequence by means of Steve Martini. This time he has moved south from Northern California to San Diego and is romantically entangled with Susan McKay. I don't keep in mind her from previous installments yet possibly she used to be there. At any cost she is imperative to the story.A former shopper and buddy who has gained the lottery desires to lease Madriani and his side-kick Harry Hinds to discover his lacking grand-daughter who has been kid-napped via his junkie daughter, an ex-con who simply wishes her father's money. the percentages are opposed to Madriani, in particular on condition that a rampant feminist, Suade, it sounds as if helped coordinate the kidnapping. but if Suade is murdered and every little thing issues to his shopper because the in charge party,

issues get delicate. Martini retains the reader guessing, yet finally pulls a number of surprising playing cards out of his sleeve on the finish to make this a touch much less plausible tale than past ones. Grade: B
