Description

Rancher Rye swore he'd never get burnt again, but now he's feeling the heat...

Lisa Johansen had been raised around the world in the most primitive cultures her anthropologist-parents could reach. Finally they sent her back to the United States to find a husband. But Lisa wanted something more.

Ryan McCall had been raised with the best his wealthy father could provide. Now his father impatiently awaited the arrival of grandchildren. But Rye wasn't interested in any of the well-trained beauties his father kept sending. Rye wanted something more.

In McCall's meadow, both of them find the fever that burns through flesh all the way to the soul. But can that fever survive the civilization beyond the meadow's timeless beauty?

Insightful reviews

Lorena: Love any book by this author. review latet

C K: The McCall's books are all great reads. This is an author that I have read a lot of and have added her books to my 'keeper' book shelf. Most I have read at least twice and some even more than that. Always in depth characters that anyone can identify with on some level.

Donnelle: This book doesn't offer anything in the way of unpredictability or twists. However, what it does offer is a chemistry-filled love story that evokes surprisingly powerful emotions.

The story is not long, but Lowell expects readers to buy that two people who are nearly polar opposites in terms of temperament, life experiences, etc., can meet, fall in love, deal with the requisite scenario that tears them apart, and somehow find their way back to each other, all in less than 250 pages. What I didn't expect was that I *did* buy it. Lowell has created two characters who are both actually interesting. Granted, Lisa is almost too naive, innocent, and sweet, but given her past, it works. Rye is pretty much the stereotypical discontent, rich bad boy, but his behavior isn't out of line with what he's gone through, courtesy of his father. Together, Lisa and Rye are simultaneously sweet and tender, and downright steamy - their chemistry is intense and pretty hot.

The best thing about this book, though, is that their love seems completely real and organic; it's very easy to buy the depth of their emotions (which certainly doesn't hold true for every romance novel). Rye and Lisa's story is surprisingly moving and deeply romantic, so I highly recommend this book for anyone who wants to read a deep, pure love story.

E_bookpushers: electronic re-release - convinced components make me tear up each time. Love how Lowell defined non-Western or tribal time.

JoAnne: Lisa is a special type of woman. She was once raised in primitive (to Americans)

places. Her mom and dad are anthropologists and so they raised her within the box as they have been learning assorted cultures. She got here to the United States to determine if she slot in there. Her mom and dad despatched her to discover a husband. A professor pal of her mom and dad prepared for her to have a summer season task looking at crops develop in a meadow in Utah. he's additionally charged with discovering her a husband. yet Lisa does not really need that. She meets Rye, a cowhand, and feels a fever for him. She hasn't ever felt like this for a man. The meadow is the favourite position for the ranch proprietor Ryan McCall. His father is attempting to get him married off and bring heirs. yet each girl he has ever met has purely sought after him for his money. He comes into the meadow and meets Lisa. He didn't be aware of she was once there simply because he was once in Texas while she arrived. firstly he thinks she is there to trap him. yet he's captivated via her innocence and beauty. He pretends to be a cowhand on the ranch. Can he enable her love him?

Alix: Dated and cringe-worthy at times, yet nonetheless an endearing romance within the truest experience of these twenty 12 months outdated western romances.
