## Insightful reviews

Rd. Sya'rani: nah buku ini saya kemarin liat versi barunya di Togamas Ujo, anak-anak sekarang harusnya lebih dikenalkan dengan karya-karya Enyd Blyton, yang sungguh tak membosankan, buktinya saya masih aja baca \*eh

Keerti: It was a very interesting book. A must-read for all those who have not read it.

Darsh: I decided to read this book because it recommended by one of my friend. This book fits in the 'a book with a male main character' no the bingo board. The most interesting character I found in this book was the cat because even when the book finished you couldn't solve the mystery of it because it kept on appearing and disappearing. My favorite quote from this book is 'what is wrong with this cat' because that quote shows the importance of the cat. Lastly from this book I have learned that there are mysteries in real life because as I read the book it made me believe that.

Lourdes Calleja: this can be what bought me begun studying in English (i'm Maltese, English is my moment language) and this ebook is what I mentioned in my English class, it's one in every of my favorites evidently :)

Andy Blundell: This was once the 1st right e-book that I learn all alone while i used to be a child. although my reproduction used to be handed directly to more youthful siblings (not earlier than being re-read a number of times) and has most likely lengthy on the grounds that disintegrated, I nonetheless have an excellent affection for this story. This is the second one of the tales that includes the gang of kids who name themselves the 5 find-outers. whilst a invaluable Siamese cat disappears, their friend, Luke, the gardener's boy is blamed they usually got down to locate the genuine culprit. On it truly is personal this ebook is an unique little mystery:- it's only for those who learn different books within the sequence that you simply become aware of that the wrongdoer is sort of continually the only disagreeable personality within the tale (apart from the hopeless village policeman, Mr Goon) and will too simply be noticed via the typical 8 12 months old.
