Description

With the Nazis bombing London on a nightly basis, many families sent their children to the comparative safety of the countryside. When the Blitz ended, the families came for their kids, but no one ever came for Simon Thorn. His name appears on no evacuation list, and none of his belongings offer any clues to his origins. Now an adult, Simon is puzzled by an odd sense of familiarity when he walks down certain London streets. He remembers years of screaming nightmares that would terrify his bewildered foster parents. And he resolves to find out where he originally came from, even as everything he uncovers suggests that, really, he doesn't want to know.

Insightful reviews

Kristen: During the bombing of London, several families sent their children to temporary homes in the country for safety. Simon Thorn is one young boy who does not belong to the group of twenty sent to Yeasdon Station. He is assigned to live with the Cutheridge family and is later adopted by them. He has no recall of his life in London. Years later, working as a zoologist at the London Zoo, he plunges into his past to learn who he is, where he came from, and all about his birth family. An interesting read, suspenseful, and well-written, but somewhat flat.

Rose Ann : Excellent. Kept me guessing til the last page.

Jonjie Javinjar: This Book is a story of a boy that tries to search for his family because they were separated by the World War.

Krista: sturdy booklet a few boy uncovering who he was once and why.

Meryl Natchez: A well-written secret with an strange format. an additional boy seems to be in a trainload of evacuees from London in 1941, and there the plot takes off. <http://www.dactyls-and-drakes.com/lit...>
