Insightful reviews

Beth Hartnett: In 1971, one of my favorite childhood books of all time, *The Rats of NIMH*, won the Newbery Award. In 1986, the author's daughter penned a sequel. Racso, a city rat and son of Jenner, finds his way to Thorn Valley where the rats of NIMH have built their sustainable colony and a new life of freedom without having to steal food or electricity from humans. When developers begin building a dam that will turn their home into a lake, the rats need a plan to sabotage the project. With a little help from their friends, Timothy, son of a mouse who was also experimented on at NIMH, Jeremy, the crow, and even the great horned owl of the forest, the adventure begins!

?Belleza??: Timothy, Mrs. Frisby's son is on his way to school with the Rats of NIMH, that is he is traveling to the school the Rats have. On his way he encounters Racso, a brash young rat, rather small who is also trying to find the Rats. How he knows about the Rats is (SPOILER).

The two of them travel together and get into trouble, at the school his only friend is Timothy due to his attitude. With time and help from Timothy of some of the older rats, he learns and applies himself to help the Rats avert the (SPOILER).

Once again this book has the expected happy ending, some sadness and scary situations, but not too scary. Good for schoolage children.

Deena: The only thing that kept this from being 4 stars for me is that Racso is written a little *too* well!!

I was very glad to learn that the author is the daughter of the man who wrote the original story. I haven't read it, but I've always meant to, and I'm just OCD enough about such things that to have this sequel written by some random stranger would really have irritated me.

This can definitely be read and enjoyed even without having read the previous story, although I think it assumes we have (there are spoilers in it for the first book). The cast of characters was a bit large to really individualize, but Ms. Conly did about as well as could be expected with that.

This was sweet and fun, and I would absolutely have adored it if I'd read it as a child.

B. Reese: I consider interpreting this in sixth grade and i beloved it. I have in mind not anything else.

Manethraen: Six be aware studies A fondly remembered light-weight ratty romp

Barbara: certainly inferior to the 1st book. yet OK. learn for the July 2010 kid's publication membership on the library. the youngsters beloved it. they'd envisioned what they idea could occur and one in all them received it simply right. they wish to learn the 3rd and ultimate one within the trilogy. i am joyful there are just three. I additionally most likely will not attempt one other sequence for the club. Makes it too difficult to herald new members.
