Description

J. M. Adovasio has spent the last thirty years at the center of one of our most fiery scientific debates: Who were the first humans in the Americas, and how and when did they get there?

At its heart, *The First Americans* is the story of the revolution in thinking that Adovasio and his fellow archaeologists have brought about, and the firestorm it has ignited. As he writes, "The work of lifetimes has been put at risk, reputations have been damaged, an astounding amount of silliness and even profound stupidity has been taken as serious thought, and always lurking in the background of all the argumentation and gnashing of tenets has been the question of whether the field of archaeology can ever be pursued as a science."

Insightful reviews

James Loftus: This book started out so well. However, turned out to draw no final, definitive conclusion. However the authors contribution to the archeological record is immense - good on him! As a writer. Very good style. Obviously, brilliant.

Paul Lunger: J.M. Adovasio & Jake Page's "The First Americans: In Pursuit of Archaeology's Greatest Mystery" is the story of the quest for the origins of the original inhabitants of the American continent. This well researched book covers everything from the early history of man through Clovis & the Meadowcroft rock shelter as well. Each chapter is written in a way that keeps we the reader invested in the research & the discussion of the dates & just how the early Americans populated the continent. Included in the book are illustrations that add to this very interesting read.

Candace Pruett: this is a lot about Adovasio, his site, views, and ego. It had some useful info in it though.

Grégoire: A pity the e-book was once so badly translated to portuguese. each web page or so, you end up puzzling over what the unique textual content quite was. Very frustrating, contemplating the cost of books in Brazil. when you have the chance to do so, locate an English version. Nonetheless, the examining is particularly pleasant, and James Adovasio is meticulously convincing.

Penny: while Dave and that i went to Meadowcroft Rock preserve on 6-3-2011, we bought this e-book by means of the archaeologist/author who labored in this site. The radiocarbon dates for the human artifacts came across at this web site have been approximately 13,000 years outdated which have been 1,500 years ahead of the earliest approved date for individuals to be within the Americas! Later the writer discovered continues to be from 16,000 years ago. So this can be the tale of the intriguing and arguable study performed there considering that 1973. The web site is amazing to go to too!

Brad: Dr Adovasio tells it love it is.
