## Description

### **BELIEVE IN YOURSELF AND ALMOST ANYTHING CAN HAPPEN!**

Mystical, motivating and inspiring, *The Magic of Believing* is an extraordinary self-improvement program which draws on the philosophy that the energy of the subconscious mind can help individuals achieve any goal. With a step-by-step system for tapping and unleashing the powers of the mind, listeners will learn:

- \* How to think more clearly and effectively to attain their highest goals
- \* How to activate these goals and put them to work
- \* The powers of self-suggestion and self-affirmation -- keys to creating new ways of thinking and believing
- \* How to combine mental pictures with the power of the subconscious so that any goal you imagine can be realized in the real world

Written in 1948, *The Magic of Believing* has helped thousands attain both personal and professional goals and the appeal of its philosophy remains a powerful tool for change. Now you can turn your thoughts into real achievements too!

### **WHY WAIT FOR BETTER TIMES WHEN YOU CAN MAKE THEM HAPPEN NOW?**

Leaders of government and industry...stars of stage and screen...giants of science and the business world agree...These clear, easy-to-follow principles changed their lives and they can change yours, too!

Formulated by a successful businessman and world traveler, this method has been used by millions for over three decades. *The Magic of Believing* offers the key to a world of unlimited opportunity. Now you can discover:

- \* How to become the person you believe yourself to be
- \* How to use your imagination to set your goals
- \* Three sure-fire steps to getting what you want
- \* The power of suggestion: How to use your thoughts to make things happen
- \* Mental picture: The art of turning thoughts into action, results and rewards
- \* Why and how believing makes it so

---

Make your job work for you. Start your own business. Increase your income. Lose weight. Add love to your life. Whatever your goal, you can make it happen through *The Magic of Believing!*

## Insightful reviews

Elizabeth J.: I read this book way before the New Age Started back in early 80's. This is one of the first books I read and it saved my life. I put into practice all that Bristol said. It all works.

Yes all the new age books these days are copies off the greats like Bristol, Louise Hayes "You can heal your life." Anthony Robbins "Unlimited Power" and on..

Anyone who reads this and our open to teaching their intuition about the word "now" and about keeping ones mind blank by singing a specific song you will heal yourself and your life. Easily bringing to you all that you want for your life now. I taught so many clients from these books and so many more - I was a psychotherapist in private practice dealing with P.T.S.D. and helped so many people with these concepts! Great book and a must read - forget about "Secrets" it is only for money grabbing.

Sanjay Gautam: It is the book from where the book such as 'the secret' has been inspired, in fact all of the book based on 'law of attraction'. Its a book that tells the power of belief.

p.s. Its not a book on positive thinking.

O Aetos: Good book, gives emphasis on the power of repetition and how reps turn in to our habits and how to change into positive ones. Provides techniques on forming good habits for the subconscious mind.

Prashant: The Magic of Believing- Claude 'Virtually something should be yours, and you may be anything, while you are capable of advance a 'knowing'"Do you think in Magic, do you think in a few mystical power, which runs the world, and ensure that every little thing runs as in line with the desire of an individual? if you'd like be triumphant by way of controlling your unconscious than this can be the ebook for you.Claude Bristol was once a hard-headed journalist for numerous years, together with stints as a police reporter and as church editor of a giant urban newspaper. during this put up he met humans from each denomination and sect, and later learn hundreds of thousands of books on psychology, religion, science, metaphysics and historical magic. Gradually, Bristol started to see the 'golden thread' which runs via all religions and esoteric teachings: that trust itself has outstanding powers.Having spent years pondering the facility of thought, he had assumed others knew anything approximately it too. He used to be wrong. Strangely, he stumbled on that the majority humans plow through existence with out realising the influence that powerful trust may have on attaining their objectives - they go away their wishes obscure they usually get obscure outcomes.Bristol had realized the reality of thinker William James' assertion that "Belief creates its verification in fact". simply as apprehensive ideas set you as much as event the placement you cannot cease puzzling over

---

(the Biblical task said: 'What I feared so much had stumble upon me'), positive recommendations and looking forward to the simplest unavoidably shape beneficial circumstances. Belief and destiny Napoleon used to be given a celeb sapphire whilst he used to be a boy, observed by means of the prophecy that it'll convey him success and make him Emperor of France. Napoleon authorised this as fact, and for that reason to him at least, his upward thrust was once inevitable. Bristol tells the interesting tale of Opal Whiteley, the daughter of an Oregon logger, who believed herself to be the daughter of Henri d'Orleans, a Bourbon with a declare to be King of France. there has been a diary purportedly written by means of her describing her royal parents, even though such a lot believed it to be a hoax. Nevertheless, whilst Opal used to be in her twenties she used to be noticed in India, being pulled alongside regally in a carriage belonging to the Maharaja of Udaipur; it grew to become out she used to be residing within the royal household. An Oregon newspaper guy who had identified Opal in her formative years remarked: "It used to be uncanny, nearly supernatural, the way during which situations ideal themselves to her plans." This brings us to the book's most powerful message: that almost whatever could be yours, and you'll be anything, when you are capable of advance a 'knowing' approximately it that you simply do not ever have to question. Of Napoleon and Alexander the Great, Bristol says, "They grew to become supermen simply because they'd supernormal beliefs". Your trust approximately your self and your house on this planet is arguably the main determinant of success. The unconscious servant If you could comprehend the connection among the unsleeping and the unconscious minds, Bristol says, you'll get to the center of trust power. The unconscious always works to specific our private ideals and desires. it's a devoted servant which renews, publications and inspires, yet to get the main from it calls for better appreciate for and religion in what it will probably do. as the unconscious operates by way of imagery, it will be important that we feed it psychological images of what we desire. it might then visit paintings in 'living up to' the picture put prior to it, through giving us intuitions approximately what to do, the place to go, who to meet. Somehow, the unconscious is hooked up to all different minds, and during the legislation of radiation and appeal it may allure occasions and folks to you that would help make your goals reality. However, it is going to simply locate how one can make the picture actual if that picture is obvious and convincing - consequently the significance of the psychological photos of good fortune you feed it. The strength of trust can't fairly paintings in our favour till the idea turns into actually a part of us, settled within the unconscious brain as a fact. Projecting notion and belief Bristol borrows from New suggestion ideas to signify that there's intelligence in every thing that exists within the universe and that we're all associated up via a type of common mind'. The strength of your trust represents a transmitter to the universe that enters the minds of different humans or even inanimate objects. The extra strong your 'broadcast', the much more likely that the area will choose it up and react accordingly. It used to be now not impossible, acknowledged the astronomer Sir Arthur Eddington that the actual legislation of the universe should be made topic to human idea and smooth quantum physics doesn't rule it out either. Bristol's rationalization is individual with a powerful trust will exist at a undeniable vibration that seeks its like within the kind of matter. hence the startling conclusion: you don't in attaining deep felt targets via motion alone, yet are helped alongside counting on the standard and depth of the assumption that they are going to be achieved. The strength of suggestion Charms, talismans, good-luck items of any kind, by myself don't deliver reliable fortune, Bristol says, it's the trust of their efficacy that's powerful. Why do humans chant, repeat affirmations, bang drums or count number beads? Repetition is in a different way to implant a guideline into our minds, the 'white magic' which

---

allows us to show a want into an expectation. via ritualising it, by way of giving it structure, the assumption adjustments from being an insignificant desire to being impending reality. We provide thank you for what's or is set to be. The 'terrific strength of inspiration repetition', Bristol says, first overcomes cause via performing on our feelings after which penetrates into the unconscious the place it's only an issue of time prior to the idea is enacted. This, of course, is the main in the back of profitable advertisements and propaganda. Bristol contains a caution approximately misuse of the psychological expertise linked to powerful trust and suggestion: it's a strength for use constructively, to not in attaining dominance. His e-book is devoted to 'independent thinkers of all times' who desire to use trust for creative, life-affirming ends. He talks a lot of the ability of trust to bodily heal, for instance. Final word The Magic of Believing is rambling and its references are dated; you'll end up announcing 'get to the point'. a few readers can also be grew to become off by way of the unscientific nature of the book, but the unusual factor approximately it's that it could actually demonstrate extra to you on second, 3rd or fourth readings. it could actually even be tough to abdominal a few of this 'mind stuff' because the writer calls it. He himself was once sceptical, yet then realised that all of us summon the magic of believing once we desperately wish anything to come back into being. Captured an excellent half from different reports from stable reads.

Tami: strong stuff! This booklet is stuffed with wisdom. it truly is a simple and stress-free read. test it. i think you are going to like it.)

?1740 Investments?: Claude Bristol used to be a hard-headed journalist for a number of years, together with stints as a police reporter and as church editor of a big urban newspaper. during this publish he met humans from each denomination and sect, and later learn hundreds of thousands of books on psychology, religion, science, metaphysics and historic magic. Gradually, Bristol started to see the 'golden thread' which runs via all religions and esoteric teachings: that trust itself has notable powers. Having spent years considering the ability of thought, he had assumed others knew anything approximately it too. He was once wrong. Strangely, he came across that almost all humans plow through existence with no realising the impression that robust trust may have on achieving their pursuits - they go away their wants obscure and they get imprecise outcomes. When Bristol used to be a soldier in global warfare One, there has been a interval during which he had no pay and could not even find the money for cigarettes. He made up his brain that after he obtained again to civilian lifestyles "he might have loads of money". In his brain this was once a decision, no longer a wish. slightly an afternoon had handed after his arrival again domestic while he was once contacted through a banker who had obvious a narrative on him within the neighborhood newspaper. He used to be provided a job, and although he begun on a small salary, he continually saved prior to him 'a psychological photo of wealth'. In quiet moments or whereas at the telephone, he doodled '\$\$\$' symptoms on bits of paper that crossed his desk. This definiteness of belief, he suggests, greater than anything cleared the path for a hugely winning profession in funding banking and business. Bristol had realized the reality of thinker William James' assertion that "Belief creates its verification in fact". simply as apprehensive suggestions set you as much as adventure the placement you cannot cease wondering (the Biblical task said: 'What I feared such a lot had encounter me'), positive techniques and looking forward to the easiest unavoidably shape beneficial circumstances. Belief and destiny Napoleon was once given a celebrity sapphire while he used to be a boy, observed through the prophecy that it should carry him success and make
