A sweeping critique of the assumptions the mind makes, of how humans tend to categorize objects and ideas, and of the implications of these modes of thought. Illustrated.

Insightful reviews

Roy Kenagy: Essential reading for librarians - cognitive categorization theory. How real people (as opposed to librarians) classify stuff. Hint: we're not even close.

Damon: This book is not only a fantastic book on linguistics and methods of word categorization, it is also incredibly insightful as to the nature of culture, and how truly different cultural perceptions of the world can be.

Kimmo: Lakoffs is quintessential reading about semiotic-thinking

H.d.: Tomando como ponto de partida o conceito de categorização em vários povos, Lakoff mostra como modificar o conceito de categorização em si é o mesmo que mudar nosso entendimento do mundo. Grande livro que apresenta uma crítica ao mesmo pace respeitosa e contundente ao Objetivismo.

Michael Mena: half II of this booklet might have been a distinct booklet all together. Still, a desirable creation to cognitive linguistics!

Kate O'Neill: This e-book has been a vital piece of my considering round how we strategy the area and body the suggestions we encounter. My paintings in indexation and taxonomy construction has been seriously prompted via it, and, even though it was once written good prior to the electronic info onslaught, it keeps to supply a proper framework in facing on-line content material and data architecture.
